

## CITY COUNCIL AGENDA ITEMS

**To:** Mayor Graham and City Council  
**From:** Dennis Sullivan, Director of Engineering & Public Works  
Walter Denton, City Administrator  
**Date:** April 7, 2008  
**Subject:** RESOLUTION – Design of Southview Gardens Drainage Improvements – Phase 1

**List of committees that have reviewed:** Public Works

**Background:** This proposal from Rhutasel and Associates is for the design of Southview Gardens Drainage Improvements. Rhutasel accomplished a review of the drainage features in Southview in 2005, commenting on deficiencies in culvert pipes and drainage structures as well as ditches. This proposal is to design modifications to eliminate the deficiencies in the pipes and structures commented on in that earlier report to meet current IDOT standards for residential neighborhood drainage requirements.

**Legal Considerations, if any:** None, beyond normal consideration when contracting for professional services.

**Budget Impact:** The design and coordination will be funded by Prop S funding reserved in the FY09 budget.

**Staff recommendation:** Staff recommends approval of the contract with Rhutasel and Associates, Inc in an amount not to exceed \$27,000.
