

## CITY COUNCIL AGENDA ITEMS

**To:** Mayor Graham and City Council  
**From:** Dennis Sullivan, Director of Engineering & Public Works  
Walter Denton, City Administrator  
**Date:** August 2, 2004  
**Subject:** Public Safety Building Green Space Grading

**List of committees that have reviewed:** Public Works Committee

**Background:** Rhutasel and Associates, Inc. was asked to provide a proposal for surveying and engineering to grade the green space (17.4 acres) adjacent to the new Public Safety building (not included in the Public Safety Building construction package), install culverts and create a wet stormwater detention pond with aerator/fountain (see attached drawing). Rhutasel previously provided a plan for the grading of the north half of the area; however, the need for the detention pond in that area is a change that needs to be addressed along with grading of the southern area.

**Legal Considerations, if any:** None beyond those normally associated with award for professional services.

**Budget Impact:** This was an anticipated item in this year's budgeting process.

**Staff recommendation:** Staff recommends execution of the RESOLUTION in the amount of \$11,600.00.
