

CITY COUNCIL AGENDA ITEMS

To: Mayor Graham and City Council
From: Dennis Sullivan, Director of Engineering & Public Works
Walter Denton, City Administrator
Date: February 7, 2005
Subject: RESOLUTION – Rhutasel Proposal for Seven Hills Road/Joseph Drainage Improvement Proposal

List of committees that have reviewed: Public Works Committee.

Background: Rhutasel and Associates were asked to provide a proposal for correction of a drainage problem in the right-of-way in the vicinity of the driveway leading to the residence at 777 North Seven Hills Road (Joseph Property) and construction of a box culvert extension in the vicinity of a driveway leading to the residence at 758 North Seven Hills Road. Currently, there is no ditch or other structure to take sheet flow off of the farm fields at the 777 address resulting in water during heavy rain events flowing across Seven Hills road in that vicinity causing a road hazard. Near the 758 address the sidewalk along the road cannot cross a creek. The extension of the box culvert will allow completion of the sidewalk in that area.

Legal Considerations, if any: Normal considerations for an engineering agreement.

Budget Impact: The design and improvements will be funded by Proposition S monies for drainage and sidewalk work in the amount not to exceed \$15,800.00.

Staff recommendation: Staff recommend execution of the RESOLUTION.
