

CITY COUNCIL AGENDA ITEMS

To: Mayor Graham and City Council
From: Dennis Sullivan, Director of Engineering & Public Works
Walter Denton, City Administrator
Date: March 7, 2005
Subject: RESOLUTION – Milburn School Road Water Main Extension Project
Bid Opening Results and Recommendation

List of committees that have reviewed: Public Works Committee

Background: The City desires to extend its 12" water main along Milburn School Road from near Pausch Road to Old Collinsville Road a distance of nearly 7,600-feet. This will allow the City to serve the new Windsor Creek and Milburn Estates Subdivisions as well as residents along the road. Connection of the Old Collinsville Road main with the Milburn School Road main extension provides another loop in our system, providing redundant service to our customers and improving fire flow capabilities at our hydrants in the area.

Ehret Plumbing and Heating is the apparent low bidder at \$278,148.85. Engineer's estimate was \$362,807.

Legal Considerations, if any: None beyond that normally associated with construction projects.

Budget Impact: The cost is covered under the approved FY2005 Water Budget.

Staff recommendation: Staff recommends execution of the RESOLUTION.
