

CITY COUNCIL AGENDA ITEMS

To: Mayor Graham and City Council
From: Dennis Sullivan, Director of Engineering & Public Works
Walter Denton, City Administrator
Date: April 4, 2005
Subject: RESOLUTION – Roundabout for State/Obernuefemann Intersection

List of committees that have reviewed: Public Works and Public Safety Committees

Background: To mitigate congestion caused by the current two-way stop at the intersection and not replace that control with an automated signal, Horner & Shifrin who are currently designing the improvements to Simmons Road for the City proposed the installation of a roundabout. As a result of that suggestion and submission of documentation prepared by them to apply for funding through IDOT, the consultant has submitted the proposal to design the roundabout.

Legal Considerations, if any: None, beyond normal consideration when contracting for professional services.

Budget Impact: Local MFT funding held in reserve for opportunities such as this one will be used to supplement CMAQ or Safety funding allocations managed by IDOT.

Staff recommendation: Staff recommends approval of the contract with Horner & Shifrin the amount of \$78,122.40.
