

## CITY COUNCIL AGENDA ITEMS

**To:** Mayor Graham and City Council  
**From:** Dennis Sullivan, Director of Engineering & Public Works  
Walter Denton, City Administrator  
**Date:** July 18, 2005  
**Subject:** RESOLUTION - Surveying of Temporary and Permanent Easements and ROW for Reconstruction of Simmons Road

**List of committees that have reviewed:** None.

**Background:** Simmons Road is being reconstructed during the Summer of 2006. This is a federally funded project overseen by IDOT. Horner and Shifrin has been retained by the City of O'Fallon to design the project. The project design that has been approved will affect approximately 5 parcels requiring temporary easements, permanent easements, or right-of-way acquisition. Horner and Shifrin's surveyor will determine the legal descriptions of needed parcel segments.

**Legal Considerations, if any:** Typical legal considerations involved in obtaining professional services.

**Budget Impact:** The \$11,236.00 proposal from Horner and Shifrin is eligible for payment from motor fuel tax funding that is available for this requirement.

**Staff recommendation:** Staff recommends entering into agreement with Horner and Shifrin for the needed surveying services.
