

CITY COUNCIL AGENDA ITEMS

To: Mayor Graham and City Council
From: Dennis Sullivan, Director of Engineering & Public Works
Walter Denton, City Administrator
Date: June 5, 2006
Subject: RESOLUTION - Agreements with Burns & McDonnell for
Elevated Water Storage Tank Design (Phase One Environmental
Assessment & Reflection Seismic Survey of Underlying Soils and Bedrock)

List of committees that have reviewed: None

Background: The elevated water tanks are an IEPA requirement from their October 2005 inspection of our water system. Engineering services for the design of two elevated water storage tanks with a capacity of 1,000,000 gallons each are needed. The estimated construction cost of each tank is approximately \$2,000,000.

Legal Considerations, if any: None beyond that for obtaining consulting services.

Budget Impact: Funding for this design work is contained in the FY07 budget.

Staff recommendation: Staff recommends execution of the RESOLUTION agreement with Burns & McDonnell not to exceed the amount of \$21,100.00 for the subject services needed to support the total design package.
