

CITY COUNCIL AGENDA ITEM

To: Mayor Graham and City Council
From: Dennis Sullivan, Director of Engineering & Public Works
Walter Denton, City Administrator
Date: November 6, 2006
Subject: RESOLUTION - Agreement with Hoelscher Engineering for
904 Matthew Culvert (Referred to as "Laverna Evans Detention and
Drainage Study by Hoelscher)

List of committees that have reviewed: None

Background: Hoelscher Engineering was asked to submit a proposal for topographic surveying, hydrologic and hydraulic analysis, a schematic improvement design, and preliminary cost estimates of a remediation of the problem associated with a culvert pipe at 904 Matthew across from Laverna Evans Elementary School. The pipe there is inadequate to take the flow of stormwater generated by the impervious surfaces associated with the school. Additionally, the culvert discharges into a reach of Rock Spring Creek behind the home at this address causing severe erosion. The location of the problem is in the area denoted by the large pile of riprap adjacent to the roadway.

Legal Considerations, if any: None beyond that for obtaining consulting services.

Budget Impact: Funding for this analysis and support work will come from Proposition S funds set aside for stormwater engineering.

Staff recommendation: Staff recommends execution of the RESOLUTION agreement with Hoelscher not to exceed the amount of \$12,700 for the subject services needed to assess the problem and determine a future course of action.
