

CITY COUNCIL AGENDA ITEMS

To: Mayor Graham and City Council
From: Dennis Sullivan, Director of Engineering & Public Works
Walter Denton, City Administrator
Date: May 7, 2007
Subject: RESOLUTION – Installation and Maintenance of Sidewalks with ADA Ramps Along South Lincoln

List of committees that have reviewed: None

Background: The City of O'Fallon desires to have developers and potentially the City install sidewalks along approximately 3,650 linear feet of South Lincoln in the County's right-of-way from Highway 50 to I-64. This requires applying for a construction permit with St. Clair County and supporting the long term maintenance liability by resolution. Council has previously supported a similar resolution for Green Mount Road.

Legal Considerations, if any: Normal concerns when engaging in construction and ensuring future maintenance of infrastructure.

Budget Impact: None immediately as sidewalk construction supported by the permit is for work in CY2007 to be accomplished by developers. Future construction by the City to fill in some gaps may be required beyond the anticipated maintenance.

Staff recommendation: Staff recommends execution of the permit application by the Mayor's signature and passage of the resolution to support future maintenance of the sidewalks as needed in the future.
