

CITY COUNCIL AGENDA ITEMS

To: Mayor Graham and City Council
From: Dennis Sullivan, Director of Engineering & Public Works and
Walter Denton, City Administrator
Date: January 7, 2008
Subject: ORDINANCE - Snow Routes

List of committees that have reviewed: None.

Background: Staff reviewed the current map and ordinance finding discrepancies between the two. Additionally, due to development and annexation, modifications of the map and ordinance were needed. The City has in excess of 40 miles of road that are designated as snow routes of the 140 miles of roads the City maintains.

Legal Considerations, if any: Not applicable.

Budget Impact: The impact of snow removal on the budget is speculative at best. From recent history, however, our budget is adequate to take on additional snow routes.

Staff recommendation: Staff recommends Council pass an amendment to the existing ordinance to allow for corrections and new snow routes.
