

CITY COUNCIL AGENDA ITEMS

To: Mayor Graham and City Council
From: Dennis Sullivan, Director of Engineering & Public Works
Walter Denton, City Administrator
Date: August 4, 2008
Subject: RESOLUTION – Northwest Quadrant Water Main Loop

List of committees that have reviewed: Public Works

Background: This proposal from Burns & McDonnell will provide a design and the specifications for a 16" water main. It will run from the intersection of Milburn School and Old Collinsville Roads to near the entrance of Far Oaks Subdivision then east to the new water tower site on Pausch Road, some 13,000' of line.

Legal Considerations, if any: None, beyond normal consideration when contracting for professional services.

Budget Impact: This project due to the real estate easements needed will likely not be ready for construction until 2010 or 2011. The design cost can be funded by already programmed funds.

Staff recommendation: Staff recommends approval of the contract with Burns & McDonnell in the amount of \$92,000.
