

CITY COUNCIL AGENDA ITEMS

To: Mayor Graham and City Council
From: Dennis Sullivan, Director of Engineering & Public Works
Walter Denton, City Administrator
Date: December 1, 2008
Subject: RESOLUTION – Authorization for Old Collinsville Road Reconstruction - MFT Expenditures

List of committees that have reviewed: Public Works

Background: IDOT approves all MFT funds spent on a project by a municipality. Their approval is predicated on the municipality supporting the expenditure by Council resolution. This resolution is to support the estimate for current and future expenditures on this project; however, due to the unknown (costs of right-of-way, easements and scope creep as a result of IDOT and Federal Highway Administration comments) future supplemental authorizations may be needed. Recent comments have caused an expansion of the area to be reconstructed, specifically the intersection of Milburn School and Old Collinsville Roads.

Legal Considerations, if any: None

Budget Impact: MFT Funds are available to support the expenditures that will be made under this authorization.

Staff recommendation: Staff recommends approval of the IDOT-required resolution in an amount of \$120,000.
