

CITY COUNCIL AGENDA ITEM

To: Mayor Graham and City Council
From: Dennis Sullivan, Director of Engineering & Public Works
Walter Denton, City Administrator
Date: June 7, 2010
Subject: RESOLUTION – Southview Drive Culvert Replacement

List of committees that have reviewed: Public Works Committee.

Background: The culvert pipe running under Southview Drive on a tributary to Rock Spring Creek has lost its downstream headwall and is showing signs of deteriorating structural integrity. The culvert may soon be compromised to such a point that Southview Drive could be undermined.

Legal Considerations, if any: None beyond that for obtaining consulting services.

Budget Impact: Funding for this design will come from Proposition S design funds for other projects as funding for this design was not specifically contained in the FY11 budget. Design is unfortunately a priority now due to the threat of road collapse.

Staff recommendation: Staff recommends execution of the RESOLUTION for an agreement with Hoelscher in an amount of \$41,300 to conduct the field surveying, design the installation of a new pipe under the road and for erosion mitigation measures as well as preparing the construction drawings and specifications, bid documents, providing construction observation and as-built plans.
