Surcharge for industrial Users -

Effective April 1, 2006, the following is the procedure for determining an industrial user surcharge:

1. Obtain representative B.O.D. and suspended solids concentrations in the waste. This may require 24-hour composite sampling for one or more days.
2. B.O.D. surcharge equals (B.O.D. — 200) × number of million gallons used × 8.33 × \$0.17 per pound.
3. Suspended solids (SS) surcharge equals (SS — 250) × number of million gallons used × \$0.32.
4. The above surcharges are added monthly to the base user rate.
