

## Residential Fire Sprinkler Option

A residential automatic fire sprinkler system is one of many ways to protect your home and family from residential fire. Automatic fire sprinklers are not required by the City of O'Fallon in new residential construction and the City does not advocate for or against their installation. The purpose of this document is to ensure you have been provided sufficient information to make an educated decision when determining whether to invest in this optional safety feature for your new home.

1. Was the option of installing a fire sprinkler system offered to you by the builder or builder's representative?  
Yes                      No
  
2. Were you given a printed informational sheet about residential sprinklers?  
Yes                      No
  
3. Were you given cost estimates for installation of residential sprinklers?  
Yes                      No
  
4. Did you choose to purchase a residential sprinkler system for your new home?  
Yes                      No

***You can obtain additional information on residential fire sprinklers at the following website***
