# Summary

The National Citizen Survey<sup>™</sup> (The NCS<sup>™</sup>) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. The NCS captures residents' opinions within the three pillars of a community (Community Characteristics, Governance and Participation) across eight central facets of community (Safety, Mobility, Natural Environment, Built Environment, Economy, Recreation and Wellness, Education and Enrichment and Community Engagement). This report summarizes O'Fallon's performance in the eight facets of community livability with the "General" rating as a summary of results from the overarching questions not shown within any of the eight facets. The "Overall" represents the community pillar in its entirety (the eight facets and general).

By summarizing resident ratings across the eight facets and three pillars of a livable community, a picture of O'Fallon's community livability emerges. Below, the color of each community facet summarizes how residents rated each of the pillars that support it – Community Characteristics, Governance and Participation. When most ratings were higher than the benchmark, the color is the darkest shade; when most ratings were lower than the benchmark, the color is the lightest shade. A mix of ratings (higher and lower than the benchmark) results in a color between the extremes.

Broadly, most aspects of community livability were positive and rated similarly to the national benchmarks. Services related to Economy and Recreation and Wellness were rated more positively than elsewhere, and levels of participation in activities related to Built Environment were also higher than average. This information can be helpful in identifying the areas of community strength and areas that merit more attention.

	Comm	unity Characte	ristics		Governance		Participation			
	Higher	Similar	Lower	Higher	Similar	Lower	Higher	Similar	Lower	
Overall	7	43	0	7	37	0	2	31	3
