 - (b) Expressive of the image the City desires to project;
 - (c) Appropriate to the type of Establishment or activity to which they pertain;
 - (d) Legible in the circumstances in which they are seen; and
 - (e) Not distracting or cluttered in a manner that disturbs the safe and free flow of traffic or in a manner that may be fully or partially attributable to an increased risk of traffic accidents;
- (2) To foster high quality commercial and industrial development, and to enhance the economic vitality of existing businesses/industries by promoting the reasonable, orderly, and effective display of Signs;
- (3) To encourage sound Sign display practices, and to mitigate the objectionable effects of competition in respect to the size and placement of Signs;
- (4) To enhance the physical appearance of the City by protecting the man-made and natural beauty of the area;
- (5) To preserve the value of private property by assuring the compatibility of Signs with nearby land uses; and
- (6) To enable fair and consistent enforcement of these Sign regulations.

B. Scope:

- (1) This Article contains regulations applicable to all Signs in all zoning districts within the City, subject to any exceptions as may be authorized for pre-existing Signs governed by the regulations set forth in Article 6 (Nonconformities and Vested Rights).
- (2) These regulations are supplemented and qualified by the regulations of the particular zoning district in which a Sign may be located and by additional general regulations appearing elsewhere in the Zoning Code.
- (3) Regulations for any Signs may be made more or less restrictive in the conditions of the ordinance governing a particular Planned Use District.
- (4) The requirements of this Article may be modified as part of any Planned Development District Ordinance where alternative materials, design, or types of signage are proposed that meet or exceed the quality and other purposes of this Ordinance.

Such Lot may have no more than two (2) Freestanding Signs.
- (b) The supports of every Freestanding Sign, except within I-64 Frontage Lots, shall be designed so as to obscure the bare pole or other support by the use of architectural features such as masonry or other covering of such bare pole or other Sign supports.

- (2) Location: Freestanding Signs may be located adjacent to the front property line of the Zoning Lot on which it is situated, but shall be set back twenty feet (20') from the side abutting another Lot and from rear property lines. Freestanding Signs shall not overhang the property line or a right-of-way. All Freestanding Signs must be completely constructed on or in a landscaped island or landscaped area.

(3) Size and Height:

- (a) A Freestanding Sign, including its cabinet, structure, and/or trim, shall not exceed six feet (6') in height above the average existing finished grade at the base of such Sign, or the elevation of the adjacent street, whichever is higher. Any building-up or mounding of land at the base of such Sign generated to "lift" such Sign above a consistent grade with the Lot shall be debited against the permitted Sign height. For each additional four-

foot (4') setback from the front property line, the sign height may increase by one-foot (1') for a maximum of ten feet (10') in height.

- (b) Sign faces shall not exceed a width of twelve (12) feet.
- (c) The total Sign Area shall be four-tenths (0.4) square feet of signage per linear foot of street frontage and shall not exceed one hundred (100) square feet. Ex: 150' Frontage x 0.4 = 60 sq. ft. Sign. The Frontage length shall be measured along the front yard Building setback. (Ord 3587; passed 9-15-08)
- (d) The Sign shall be attached to a proportionate enclosed base, integrated planter or structural frame, the width of which shall be a minimum of three-quarters (3/4) the width of the widest part of the Sign. The Sign, including its base, shall be of permanent materials compatible with the primary structure. The base shall be placed in or at ground level with the top of the enclosed base extending up to a height of one (1) to three (3) feet above the average existing finished grade at the base of the Sign.
- (e) The supports of all Freestanding Signs shall not extend farther than twenty (20) inches beyond the horizontal width of either edge of the Sign.
- (f) V-shaped Signs shall have an exterior angle between faces of not more than thirty degrees (30°) with a distance between faces of such Signs at their farthest point not exceeding six feet (6').
- (g) Exceptions: The following Freestanding Signs shall be subject to the requirements above for other Freestanding Signs except as specifically noted as follows:
